Professional Summary

Detail-oriented Software Engineer (QA) with 2+ years of hands-on experience in manual testing of web, mobile, and AI-based systems, including LLM and real-time translation systems. Skilled in functional, regression, API, and performance testing using Postman, JMeter, and JIRA. Experienced in Agile/Scrum environments with a strong CS foundation, a track record of achieving 95%+ test coverage, and a commitment to delivering high-quality, defect-free software.

Professional Experience

Ibex. — Karachi, Pakistan

Software Engineer – QA

Jun 2025 – Present

- Designed and executed 200+ test cases achieving 95% coverage across web and AI-based systems.
- Performed end-to-end functional, regression, smoke, usability, load, and API testing using Postman; tracked all defects in JIRA and TestRail.
- Validated LLM outputs, speech-to-text pipelines, and real-time translation systems achieving 98% multilingual accuracy across 4+ languages.
- Collaborated with developers in daily Scrum standups to identify root causes and resolve critical defects efficiently.
- Leveraged AI-assisted tools (Copilot, ChatGPT) to generate and optimize test cases and test data, improving test coverage efficiency.
- Contributed to maintaining test documentation, test suites in TestRail, and QA knowledge base, suggested process improvements adopted by the team.

Software Analyst

Oct 2024 – Jun 2025

- Analyzed business and system requirements to define acceptance criteria and support QA planning activities.
- Assisted in functional and integration testing across multiple modules, identifying and documenting defects pre-release.
- Validated business logic against functional specifications and traced issues to root cause for developer handoff.

Summit Bank Limited — Karachi, Pakistan

Information System Audit (ISA) Intern

Jun 2023 – Aug 2023

- Assisted in IT audits and compliance reviews for core banking applications, ensuring adherence to security standards.
- Validated database integrity, security controls, and data accuracy across SQL/MySQL environments for audit compliance.

Self-Employed — Remote

Online Instructor (IT & Programming)

2022 – Present

- Delivered live programming and IT instruction to O & A-Level students, improving academic performance.
- Designed coding assignments and projects in Python and Java to strengthen students' programming fundamentals.

Technical Skills

Testing Types: Manual, Functional, Regression, Smoke, Sanity, Usability, API, Performance, Security, AI/LLM Testing

AI-Assisted Tools: Copilot, ChatGPT (test case generation, test data creation, edge-case analysis)

Test Automation: Selenium WebDriver, Playwright (Learning)

Methodologies: SDLC, STLC, Agile (Scrum, Kanban), BDD, TDD, ATDD

CI/CD: GitHub Actions, Git/GitHub

Tools: Postman, JIRA, JMeter, TestRail

Programming: Python, Java, C, C++

Databases: SQL, MySQL, PostgreSQL

Core QA Skills: Test Case Design, Bug Tracking, Defect Management, Root Cause Analysis, Test Planning

Certifications

- QA Fundamentals (Foundational Training in SQA) — 10Pearls University
- Cybersecurity Fundamentals — IBM

Education

DHA Suffa University — Karachi, Pakistan

BSc. Computer Science | CGPA: 3.34/4.00

2020 – 2024

Board of Intermediate & Secondary Education (BISE) — Sukkur, Pakistan

Intermediate in Pre-Engineering

2017 – 2019

Awards & Honours

- Dean's List – Academic Excellence Award, DHA Suffa University (2024)
- 3rd Place – Database Design Competition, Spectrum'23, DHA Suffa University (2023)

Academic Projects

Unity Uplift – Mobile Application (Flutter, Dart, Firebase)

Jan 2024 – Jul 2024

- Built a scholarship management app connecting students, NGOs, and donors with real-time updates and secure data storage.
- Designed and executed test cases covering core user flows; validated Firebase data integrity and edge cases.

Hospital Management System – Desktop Application (Java, OOP)

Sep 2022 – Dec 2022

- Developed a patient and hospital record system applying OOP principles for modular, scalable design.
- Performed functional validation across all modules, ensuring correctness of business logic prior to submission.
